

NyayaSahayak — Synthetic Case Document Pack

Case ID: NS-DEMO-002 | State vs Vikram Nair

Case identification

Case name	State vs Vikram Nair
How you refer to this matter	State vs Vikram Nair — Ashoka Road Junction Hit-and-Run Timeline Matter
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court / Ashoka Road Police Station — fictional
Short description	A synthetic hit-and-run evidence audit concerning whether a vehicle registered to Vikram Nair struck a pedestrian near Ashoka Road Junction at approximately 8:40 PM on 5 March 2026. The audit compares an eyewitness account, a partial CCTV plate capture, a vehicle telematics/GPS log, and a toll-booth timestamp that appears to conflict with the GPS log.
Case status	Hearing in progress — synthetic (three hearings on record)
Next hearing	11 September 2026 — synthetic
Primary legal issue	Whether the available material reliably places the identified vehicle at the location and time of the incident, given an unresolved timestamp discrepancy between two independent digital records.
Data status	All names, events, exhibits, and records are fictional.

Core demonstration scenario

PW-2 statement: PW-2 says a silver sedan struck a pedestrian near Ashoka Road Junction at approximately 8:40 PM and left without stopping, with a partial plate reading "TN 07". **CCTV summary:** The junction camera shows a silver sedan departing at speed around 8:41 PM; the remaining plate characters are obscured by motion blur and headlight glare. **Vehicle telematics summary:** A fleet-tracking device on a vehicle registered to Vikram Nair (plate TN07-AZ-4488) logs that vehicle at the junction at 8:41 PM. **Toll-booth summary:** An automated toll record shows the same plate passing a toll plaza 14 kilometres away at 8:50 PM — only nine minutes later, which the defence contends is not achievable through city traffic. A digital-forensics witness later raises a possible clock-drift explanation, which the defence disputes as unverified for this specific toll unit.

Expected NyayaSahayak result: Potentially conflicted evidence across two independent digital records — human review required. The system must not conclude guilt, innocence, witness dishonesty, or final liability, and must not resolve the timestamp discrepancy on its own.

DOCUMENT 1 — FIRST INFORMATION REPORT

Synthetic training document — not an official FIR

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court / Ashoka Road Police Station — fictional
Short description	Alleged hit-and-run near Ashoka Road Junction; evidence concerns the identification and timeline of the vehicle involved.
District	East Coast Demo District
Police station	Ashoka Road Police Station
Date of registration	6 March 2026
Complainant	Mohan Babu, age 41, delivery coordinator, brother of the injured person — fictional
Place of occurrence	Ashoka Road Junction, near Sunrise Bakery, Demo City
Approximate time	5 March 2026, approximately 8:40 PM
Investigating officer	Sub-Inspector R. Farooq, Badge DEMO-29 — fictional

Brief contents of information

The complainant states that his brother, Suresh Babu, was struck by a silver sedan while crossing near Ashoka Road Junction at approximately 8:40 PM on 5 March 2026, and that the vehicle left the scene without stopping. Bystanders assisted the injured person to a nearby clinic. A bystander noted a partial number plate. The complainant requests examination of nearby CCTV material and any available vehicle-tracking records.

Limitations

This synthetic document records an allegation only. It does not establish that an offence occurred, that any particular vehicle or person was involved, or that any person is legally responsible.

DOCUMENT 2 — FINAL REPORT / CHARGE-SHEET

Synthetic training document — not an official police report

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D / FR-29-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Synthetic final-report summary concerning an alleged hit-and-run and two independent digital records whose timestamps appear to conflict.
Date	20 June 2026
Investigation status	Demonstration investigation completed
Prosecution position	The vehicle is alleged to have been identified via a partial plate and a telematics log; exact timeline and driver identification remain subject to review.
Court filing status	Not filed; synthetic document only

Material proposed for review

ID	Description	Limitation
D-01	Synthetic FIR 208-D	Records an allegation only
D-02	Statement of PW-2	Reduced visibility reported at the scene
E-02	CCTV summary (junction camera)	Partial plate only; driver not visible
E-03	Vehicle telematics / GPS log	Device not independently recalibrated for this case
E-04	Toll-booth passage record	Timestamp reconciliation with E-03 disputed
D-06	Defence statement	Challenges identification and the recorded timeline

Assessment

The synthetic material indicates a possible presence claim but contains an unresolved conflict between two independent digital timestamps, alongside unresolved issues concerning visibility, plate identification, and device attribution. This document is not a determination that the evidence is sufficient.

DOCUMENT 3 — WITNESS STATEMENT

Statement of PW-2 | Synthetic training document

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court / Ashoka Road Police Station — fictional
Short description	Witness account concerning an alleged hit-and-run near Ashoka Road Junction at approximately 8:40 PM.
Evidence ID	E-01
Witness	Lakshmi Pillai / PW-2, shop assistant — fictional
Statement date	7 March 2026
Source location	Statement paragraphs 1–5

Statement

1. I was closing the shutter of my shop near Ashoka Road Junction at around 8:40 PM on 5 March 2026.
2. I heard a loud sound and saw that a silver car had struck someone near the crossing.
3. The car did not stop and turned right towards the highway service road.
4. I noted that the number plate began with "TN 07", but I could not read the remaining characters clearly because the streetlight nearest the junction was not working that evening.
5. I am not able to confirm the exact model of the car with certainty.

Audit annotations

Item	Result
Claim C-01	PW-2 says a silver car with a partial plate "TN 07" struck the pedestrian and fled toward the highway service road at approximately 8:40 PM.
Limitation L-01	Non-functioning streetlight reduced visibility of the remaining plate characters.
Limitation L-02	Vehicle model not confirmed with certainty.

DOCUMENT 4 — CCTV SUMMARY

Exhibit E-02 | Synthetic training document — no real footage attached
This is a text summary created for demonstration. It is not a real CCTV extract, image, video, or forensic report.

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Synthetic CCTV description used to assess whether the departing vehicle can be linked to the registered owner's plate.
Evidence ID	E-02
Camera ID	C-11
Location	Ashoka Road Junction, opposite Sunrise Bakery — fictional
Date / time window	5 March 2026 / 8:30 PM–8:50 PM
Source	Synthetic camera-log summary

Summary

At approximately 8:41 PM, a silver sedan is seen departing the junction area at speed toward the highway service road. The rear plate is partially visible; the first four characters correspond to "TN07", but the remaining characters are obscured by motion blur and glare from an oncoming vehicle's headlights. The driver is not visible.

Audit interpretation

Relationship to C-01	Assessment
Possible support	Consistent with a vehicle matching the general description departing the junction at the time PW-2 describes.
Unresolved identity	Does not establish the complete plate or the identity of the driver.
Human review	Inspect original high-resolution footage if available; assess motion-blur correction and chain of custody.

DOCUMENT 5 — VEHICLE TELEMATICS / GPS LOG SUMMARY

Exhibit E-03 | Synthetic training document — no real device export attached

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Synthetic fleet-tracking log summary offered to place a specific vehicle at the junction at the alleged time.
Evidence ID	E-03
Vehicle	TN07-AZ-4488, registered to Vikram Nair, delivery contractor — fictional
Provided by	Employer fleet-management system — fictional
Date / time of fix	5 March 2026, 8:41 PM
Stated location accuracy	Approximately 25 metres, per device manufacturer specification

Summary

The fleet-tracking device installed in vehicle TN07-AZ-4488 recorded a location fix placing the vehicle at Ashoka Road Junction at 8:41 PM on 5 March 2026. The exported log follows the manufacturer's standard format and has not been independently recalibrated for this case.

Audit interpretation

Relationship to C-01	Assessment
Possible support	Consistent with the vehicle being present at the junction at the alleged time.
Unresolved attribution	Fleet vehicles may be used by more than one authorised driver; the log does not by itself establish who was driving.
Human review	Obtain the device's calibration/certification record and the driver-assignment record for the relevant shift.

DOCUMENT 6 — TOLL-BOOTH PASSAGE RECORD SUMMARY

Exhibit E-04 | Synthetic training document — no real ANPR export attached

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Synthetic automated-toll record introduced by the defence; its timestamp appears to conflict with the telematics log (E-03).
Evidence ID	E-04
Source	National Highway Toll Plaza, Kavanur Bypass, approximately 14 km from the junction — fictional
Date / time of record	5 March 2026, 8:50 PM
Recorded plate	TN07-AZ-4488

Summary

An automated number-plate-recognition (ANPR) toll record shows a vehicle bearing plate TN07-AZ-4488 passing the Kavanur Bypass toll plaza, approximately 14 kilometres from Ashoka Road Junction, at 8:50 PM on 5 March 2026.

Audit interpretation — potential conflict

If both timestamps are taken at face value, the same vehicle would need to travel approximately 14 kilometres through city traffic in about nine minutes. The defence contends this is not achievable under ordinary conditions. The prosecution has raised the possibility of a clock discrepancy in one or both systems. This is a conflict between two independent digital records and requires human review before any inference is drawn from either one.

DOCUMENT 7 — DEFENCE STATEMENT

D-06 | Synthetic training document

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Filed on behalf of	Vikram Nair, accused — fictional
Filed by	Defence counsel, name withheld in this synthetic pack
Date	3 July 2026

Statement

The defence disputes that the partial plate recorded by PW-2 and the CCTV summary conclusively identifies the accused's vehicle. The defence relies on the toll-booth record (E-04) as an indicator that the vehicle could not have been at both locations as alleged, and requests a forensic timestamp-calibration review of both the fleet-tracking device (E-03) and the toll plaza's ANPR system before either record is relied upon. The defence reserves the right to call an independent witness regarding driver-shift assignment for the vehicle on the relevant evening.

DOCUMENT 8 — HEARING TRANSCRIPT

Hearing 1 | Synthetic training document

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	First hearing: examination of PW-2 and marking of the CCTV summary as an exhibit.
Hearing date	10 July 2026
Hearing type	Preliminary witness and exhibit review
Transcript status	Prepared synthetic transcript

Transcript

[00:00:04] **COURT** The prosecution may begin the examination of PW-2.

[00:00:22] **PW-2** I was closing my shop near the junction at around 8:40 PM.

[00:00:40] **PW-2** I heard a sound and saw a silver car had struck someone near the crossing.

[00:01:05] **PW-2** I noted the plate began with TN 07, but I could not read the rest clearly.

[00:01:28] **DEFENCE COUNSEL** Was the streetlight near the junction working that evening?

[00:01:36] **PW-2** No, it was not working. It was quite dark at that spot.

[00:02:02] **PROSECUTOR** The CCTV summary from Camera C-11 records a matching partial plate at 8:41 PM.

[00:02:20] **COURT** The CCTV summary shall be marked as Exhibit E-02.

[00:02:40] **DEFENCE COUNSEL** We reserve comment on identification until the complete plate, if any, is established.

[00:02:55] **COURT** Noted. The investigating officer shall produce any available vehicle-tracking material at the next hearing.

Extracted audit items

C-01: Silver car with partial plate TN 07 allegedly struck the pedestrian near the junction at approximately 8:40 PM and fled. Q-01: Can the complete plate be established from any other source?

DOCUMENT 9 — HEARING TRANSCRIPT

Hearing 2 | Synthetic training document

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Second hearing: the vehicle telematics log is presented and the defence introduces a toll-booth record that appears to conflict with it.
Hearing date	31 July 2026
Hearing type	Evidence review — telematics and toll record
Transcript status	Prepared synthetic transcript

Transcript

[00:00:06] **COURT** The prosecution may present the vehicle-tracking material referred to at the last hearing.

[00:00:24] **PROSECUTOR** The fleet-tracking device on vehicle TN07-AZ-4488, registered to the accused, recorded that vehicle at the junction at 8:41 PM.

[00:00:52] **COURT** This shall be marked as Exhibit E-03.

[00:01:10] **DEFENCE COUNSEL** We now produce a toll-booth record showing the same plate passing the Kavanur Bypass toll plaza, fourteen kilometres away, at 8:50 PM.

[00:01:38] **COURT** This shall be marked as Exhibit E-04.

[00:01:50] **DEFENCE COUNSEL** Nine minutes is not sufficient to travel fourteen kilometres through city traffic. The two records cannot both be correct as read.

[00:02:15] **PROSECUTOR** We do not concede the point. It is possible one of the two clocks is not accurately set. We request time to examine both systems' calibration records.

[00:02:40] **COURT** The apparent conflict between Exhibit E-03 and Exhibit E-04 is noted. This matter requires human review and shall not be treated as resolved. The investigating officer shall obtain calibration information for both systems before the next hearing.

Extracted audit items

C-02: Telematics log places the vehicle at the junction at 8:41 PM. C-03: Toll record places the same plate 14 km away at 8:50 PM. Q-02: Are both clocks accurately set? Q-03: Is the nine-minute interval physically consistent with the distance?

DOCUMENT 10 — HEARING TRANSCRIPT

Hearing 3 | Synthetic training document

Case name	State vs Vikram Nair
Case / file number	NS-DEMO-002 / FIR 208-D (synthetic)
Case type	Criminal
Jurisdiction	Tamil Nadu, India — fictional demonstration jurisdiction
Court / institution	Demo District Court — fictional
Short description	Third hearing: a digital-forensics witness proposes a possible clock-drift explanation for the toll record; the defence disputes that it is specific enough to rely on.
Hearing date	21 August 2026
Hearing type	Expert testimony — digital timestamp reconciliation
Transcript status	Prepared synthetic transcript

Transcript

[00:00:05] **COURT** The prosecution may call its digital-forensics witness.

[00:00:20] **EXPERT WITNESS** I have reviewed a manufacturer service bulletin for this model of toll-plaza ANPR unit. It documents a typical clock drift of approximately twelve minutes in units that have not been resynchronised within the last service interval.

[00:00:55] **EXPERT WITNESS** If that drift applied here, the actual passage time may have been closer to 9:02 PM, which would allow approximately twenty-one minutes for the fourteen-kilometre journey.

[00:01:30] **DEFENCE COUNSEL** The bulletin describes typical drift across units generally. It is not a site-specific calibration record for this particular toll lane on this date.

[00:01:50] **EXPERT WITNESS** That is correct. I have not seen a lane-specific calibration log for this unit.

[00:02:10] **DEFENCE COUNSEL** We request production of the toll plaza's own calibration log before this explanation is accepted.

[00:02:28] **PROSECUTOR** We will request that record from the toll authority.

[00:02:40] **COURT** The proposed clock-drift explanation is noted but not accepted as established. The apparent conflict between Exhibit E-03 and Exhibit E-04 remains unresolved and continues to require human review. The matter is adjourned pending the site-specific calibration record.

Extracted audit items

C-04: A twelve-minute clock-drift bulletin is offered to reconcile E-03 and E-04. Q-04: Does a general manufacturer bulletin establish the actual drift of this specific unit? Status: Unresolved — adjourned for further record production.

Source and use notes

The facts, names, events, exhibits, and records in this pack were created synthetically. Public web references were used only to understand broad document structure and are not evidence in this fictional case.

The FIR and final-report layouts follow the same fictional-demonstration format used in the NS-DEMO-001 pack, loosely informed by public police-form references such as the Puducherry Police Manual's FIR and final-report templates. Exact forms and current statutory terminology vary by jurisdiction and date.

Use this pack only for the NyayaSahayak hackathon demonstration. Do not present these documents as genuine records, submit them to an authority, or use them to make a real legal decision.
